LOS ANGELES COUNTY MUSEUM

January 26, 1950

To: Mr. Breasted and Dr. Stock

From: Hildegarde Howard

Subject: Suggestions regarding disposal, use, or storage of mounted skeletons.

HALL OF EVOLVING LIFE --

The whale skeleton, I believe, should remain in this hall whether or not all other skeletons are removed from the center. This skeleton illustrates adaptation of the mammals to aquatic life and I plan to refer to it in the Bay on Adaptation.

Until the Comparative Anatomy Unit is installed, I should like to suggest that certain representative forms be left in the center of the hall. These would be selected for the purpose of comparing the structure of the skeleton in the five classes of vertebrates and (within the Classes Mammalia, Aves and Reptilia) comparing the structure of some of the main groups. Following is a list of the forms I would suggest using:

1. "A" Case showing the skeletons of the five classes of vertebrates. This was one of the introductory cases used in the old Osteology Hall.

2. "A" Case containing a representation of bird skeletons, as follows:
   Flightless swimmer -- penguin
   Flightless runner -- kiwi
   Swimmer and diver -- loon
   Wader -- egret
   Predator -- hawk
   Fowl -- chicken
   Perching bird -- blue jay

3. To represent the reptiles
   Tortoises -- Galapagos Tortoise (in large glass case)
   Snakes -- Python
   Alligator and/or Crocodile

4. To represent the mammals
   Marsupial -- Kangaroo
   Carnivore -- Lion and bear
   Pinniped -- Sea Lion (large)
   Artiodactyls -- Elk (male), Bison (male), Alpaca
   Perissodactyl -- Mule
   Sirenian -- Manatee
   Proboscidean -- Elephant
   Primates -- Gorilla and Chimpanzee

4. To represent the mammals (Continued)

A pedestal case containing the small forms:
Insectivore -- shrew
Rodent -- mouse
Bat -- Brown Bat

It should be understood that I do not recommend maintaining this center exhibit when the Hall is completed. While the Hall is under construction, however, and only a few Bays are completed, it would provide material for class instruction in Comparative Anatomy. We have had complaints, particularly from the Universities and Colleges, that this material is not now available to them.

At the same time that we accomodate the classes, we provide storage space for some of our valuable large skeletal material, pending the acquiring (I hope) of storage room elsewhere.

Section in SB-5 in which some large skeletons are now stored --

The following skeletons now stored here are valuable and should remain:

M 641 Polar Bear
M 518 Giraffe
M 521 Moose
M 625 Nylgau (young)
M 592 Elephant Seal
M 1136 Amazon River Dolphin
F 16 Louvar (Fish)
F 17 Opah (Fish)

To these could be added the following (from Hall of Evolving Life - there will be room):

M 1002 Cow
M 908 Mule deer (male)
M 1257 Domestic goat
M 1256 Domestic sheep
M 1102 Reindeer
M 803 Pronghorn Antelope
M 519 Bactrian Camel

Skeletons which may be disposed of --

	Name	Present Location
M 1103	Nubian goat	SB-5
M 547	Roan antelope	"
M 502	Nylgau	"
M 982	Tiger (seated)	"
M 1005	Reindeer (pathological horns)	"
R 27	Python (9 ft.long,broken)	"
M 517	Giraffe (smaller of two)	Hall of Evolving Life
M 522	Camel	Calif.Inst.Tech.
M 509	Bison female	"
M 855	Chimpanzee	"
M 922	Deer, female	SB-5

Specimens now in Hall of Evolving Life, unaccounted for above:

	Name		Disposition suggested
M	551	Steller Sea Lion (small)	Disarticulate and take to laboratory
M	1206	Common Dolphin	Can be stored either in laboratory or in second floor closet at east end (back of fish groups).
M	557	Leopard	
M	1239	Malay Bear	
M	1219	Spider Monkey	
Bi	546	Ostrich	Store in closet on second floor (east)
Bi	547	Emu	Store in closet on second floor (east)
Bi	1277	Cassowary	Store in closet on second floor (east)
Bi	1278	Rhea	Store in closet on second floor (east)

All small material from the Hall of Evolving Life, and from SB-5 has already been stored, or space is reserved for it (when exhibit cases can be opened to remove it).

Skeletons to be sold:

M517 (A749) -- Giraffe
M982 (A2479) -- Tiger(seated)
M1103 (746) -- Nubian Goat (no horns)
M547 (A611) -- Roan Antelope (horns)
M922 (746) -- Mule Deer (female)
M502 (A600) -- Nylghau
R27 (A563) -- Python (9ft.long, broken, but mendable)
M1005 (2374) -- Reindeer (pathological horns)
M855 (8360 -- Young chimpanzee
~~M522 (A630) -- Camel~~
M509 (A565) -- Bison (female)
M533 (A611) -- Elk (female)
~~M560 (A285) -- Asiatic Tiger (standing)~~
M1485 (A4818) -- Horse (running)
M 587 (749) -- Red Kangaroo (disarticulated, mounted flat on board)

I suggest you mark the ones you want in order of preference. I honestly doubt whether your available sum would buy more than five, although the python and disarticulated kangaroo would not cost much. The horse, ~~xxx~~ bison, elk and camel are the most valuable

10 small rodents mounted might go in drawers of case.
1 insectivore
16 mounted med. size, will not go in drawers of cases.
the building of another rack or two in the lab would probably accomodate all of these
4 snakes -- rack building might carry also
4 turtles and an iguana

The following were originally stored in SBS - where now? (1/11/50)

Caudelpa 5 802 to CIT not to be used in HEL
Emmpa 552
Brown Bat 314
Tropic Bird 318
Toucan 1443
Chameleon 126
Iguana 1095
Parrot 943
Pheasant 328
Stork 1321
Ibis 131 Rm 44
Bittern 1141
Curlew 133

The following specimens in the modern skeleton collection could be lent to schools

Mule Deer (M922) -- Mounted skeleton of female (a zoo specimen)

Reindeer (M1005 -- Mounted skeleton of castrated animal

Roan Antelope (M547) -- Mounted skeleton (zoo animal)

Nubian Goat (1103) -- Mounted skeleton of female (zoo animal)

Tiger -- Skeleton mounted in sitting posture

Whale (M805) -- Scapula picked up on beach

Whale (L553) -- Humerus picked up on beach (A loan specimen but the lender cannot be contacted)

- - - - - - - - - - - - - - - - - - -

Elephant (L61) -- 2 Elephant tusks (Cherry collection, on loan) Suggest they be returned. The History Division has a great deal of Cherry material which they undoubtedly want, but these tusks are no longer of any use here.

The following specimens in the modern skeleton collection should be kept in the Museum, but cannot be exhibited at this time. Where can they be stored?

Moose M521 -- Mounted skeleton

Nylgau (M625 and M502) -- young and adult mounted skeletons

1948 report on SBIS

Complete list of specimens stored in laboratory which can be disposed of (with suggestions as to how to dispose of them)

M 588 -- Ac. No. A749 -- Macropus rufus from Selig Zoo, 3/11/19 keep portions which are diseased for pathology collection. Keep young skull. throw away the rest or give to Gretchen

M 584 -- Ac. No.A503 -- Skull, feet and tail of Macropus rufus from Colburn, 3/25/16

M 791 -- No accession -- Kangaroo feet. THROW AWAY

M 681 -- " " -- Kangaroo skeleton , no skull. THROW AWAY

M 918 -- Ac. No. 746 -- Bear (Black or Brown?) Grif.Pk.Zoo,male Complete skeleton, 5/10/30 (Gretchen?)

M 996 -- Ac. No. A2548 - Bear Cranium from Cuesta La Honda, donor Frank Anza, Dec.,1930. Pick-up

M 788
M 789 -- No accessions - three bear skulls with no data (Gretchen can use, or Dr. Stock)
M 790 C.I.T
